To Whom It May Concern:

It is my great pleasure to write this letter of recommendation for Anna Orosz. Since June 2020, she has worked as an intern in the department "Artificial Intelligence and Data Analysis" at MBition GmbH, a software company wholly owned by Daimler and creating software products in the automotive field. She is a very motivated and responsible person with a high degree of integrity. Anna soon became a valuable part of the data science team.

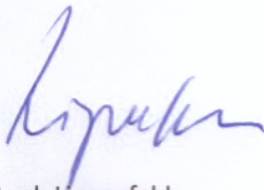

As lead Artificial Intelligence, I assigned Anna her research and implementation tasks and supervised her activities. She could always successfully apply her broad knowledge and excellent software engineering skills, especially in the area of machine learning, including the use of statistical tools and machine learning libraries.

With her expertise from university and several earlier internships, Anna quickly integrated into the data science team. She approaches tasks with dedication and attention to detail. Wherever feasible, she applies modern techniques, considerably contributing to project success.

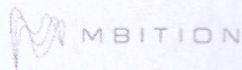

In particular, she developed from scratch an algorithm to detect problems with anonymous telematics data flowing in from Mercedes cars. She suggested, tried and evaluated various approaches to model the incoming data and to detect deviations based on this model.

Anna takes the initiative to identify problems and devise solutions. She also has good communication skills and can present and explain her work to colleagues and non-technical staff. She has demonstrated a mind well suited to the world of research and development in data science.

Sincerely,

Dr. Christoph Lingenfelder
